LIGHT GREY INTERIOR

CHILL ZONE

Driving can be stressful, so the cabin of the new Tivoli Grand is light, spacious and beautifully appointed with premium materials and luxurious features so you can really chill out and relax.

1 Rear seats reclinable to 32.5° 2 Heated front seats 3 Ventilated front seats 4 8-way power adjustable front seats

-  Ventilated & heated front seat control & indicator
-  8-way powered seat control
-  Driver's seat with 2-way lumbar control

LOAD UP AND GET GOING

New Tivoli Grand is all about space, which is why it provides a best-in-class capacity of between 720litres & 1,440litres while also offering highly flexible seat/load combinations.

There is even a discretely hidden area beneath the load floor for even greater space efficiency and added security, plus there are handy storage areas throughout the car. This huge and useable space will soon become part of your new way of living.

CHOICE OF SEATING CONFIGURATIONS Load space in litres

- 1 NORMAL SEATING (720litres)
- including hidden underfloor space
- 2 2nd row 40% FOLDED (1,004litres)
- 3 2nd row 60% FOLDED (1,156litres)
- 4 2nd row 100% FOLDED (1,440litres)

* VDA213 / 214 measurement

THE SPIRIT OF ADVENTURE

SMOOTH PERFORMER

New Tivoli Grand is powered by a petrol direct injection turbo engine with low-speed torque performance giving superior acceleration for a more exciting driving experience. There is also the option of 6-speed manual or 6-speed AISIN automatic transmissions, plus driving mode with the choice of normal, sport or winter driving setting.

1.5 GDI-TURBO PETROL ENGINE

Max. Power (PS/rpm)	163 / 5,000 ~ 5,500
Max. Torque (Nm/rpm)	280 / 1,500 ~ 4,000 (with MT) 260 / 1,500 ~ 4,000 (with AT)
Displacement	1,497 cc
Engine Model	1.5 GDi-Turbo

* With automatic transmission

AISIN 6-SPEED AUTOMATIC TRANSMISSION

Fitted to some of the finest cars in the world, the tested and proven AISIN 6-speed automatic gearbox offers smooth and quiet gear shifting with maximum fuel efficiency.

6-SPEED MANUAL TRANSMISSION

The 6-speed manual gearbox delivers a fun driving experience with maximum driver engagement. Optimised gear ratios ensure smooth and precise gear shifts, improved fuel efficiency and quiet performance.

IDLE STOP & GO SYSTEM (ISG)

When the vehicle is stationary (and the brake pedal is depressed), the engine automatically stops running, preventing idling and improving fuel economy.

DRIVE MODE SYSTEM

Selectable drive modes (Normal/Sport & Winter) optimise traction distribution and the gear shift schedule to suit driver preferences and road conditions.

YOU'RE PROTECTED

We have you covered from every angle: 360-degrees, in fact.

Our comprehensive active and passive safety features are there to protect you in every imaginable scenario.

ELECTRONIC STABILITY PROGRAM (ESP)

1 Anti-Rollover Protection(ARP) 2 Emergency Stop Signal (ESS) 3 Brake assist system (BAS)
4 Hill Descent Control (HDC) 5 Hill Start Assist (HSA)

**71.1%
HIGH-TENSILE
STEEL**

BUILT WITH THE MOST ADVANCED HIGH-STRENGTH STEEL

The rigidity, integrity and safety of the bodyshell have been strengthened by using high-tensile steel in 71.1% of its construction while also utilising Hot Press Forming.

7 AIRBAG 1 Driver's airbag 2 Driver's knee airbag 3 Passenger's airbag 4 5 Driver's & passenger's side airbags 6 7 Curtain airbag

DRIVE SMART, BE SAFE

With a suite of integrated safety controls such as Autonomous Emergency Braking (AEB), Lane Keep Assist (LKA) and Rear Cross Traffic Alert Intervention (RCTA-i), you can enjoy a new level of peace of mind wherever you are driving and whatever the road conditions.

THE LATEST ADVANCED DRIVER ASSISTANCE SYSTEMS

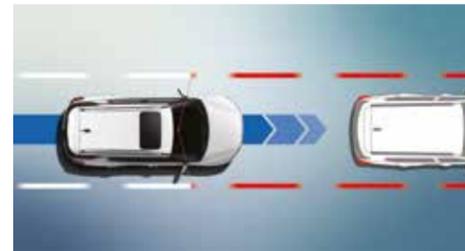

Autonomous Emergency Braking (AEB)

Helps avoid or minimise the risk of collision by detecting slower moving or stalled vehicles and warning the driver in advance.

Forward Collision Warning (FCW)

Alerts the driver when another vehicle or pedestrian appears in the path of the vehicle.

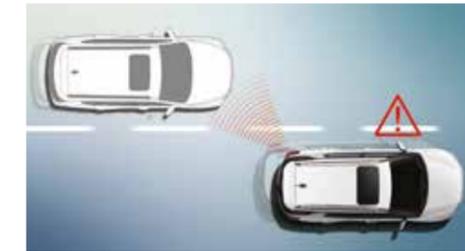

Lane Keeping Assist (LKA) Lane Departure Warning (LDW)

LKA uses a front camera to monitor the painted lane markers. On detecting an attempt to change lane without prior signaling, it automatically corrects the electric power steering to keep the vehicle within the intended lane.

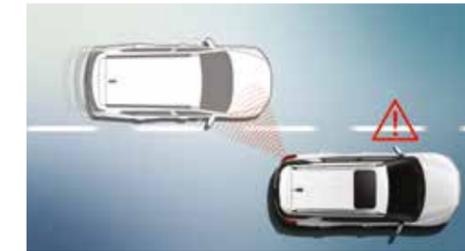

Front Vehicle Start Warning (FVSW)

FVSW attracts the driver's attention with a visual pop-up alert and audible sound when the vehicle directly in front starts to pull away.

Blind Spot-detection Warning (BSW)

Automatically assists braking if there is a risk of collision with vehicles in the blind-spot while changing lanes.

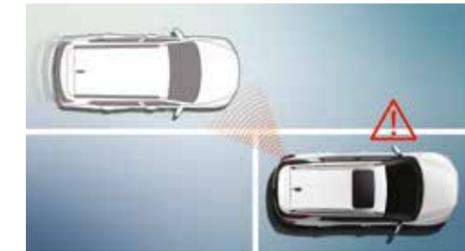

Lane Change-Collision Warning (LCW)

LCW utilises sensors to detect and warn the driver about cars approaching from behind in an adjacent lane.

Rear Cross Traffic Alert Intervention (RCTA-i) Rear Cross Traffic Warning (RCTW)

When reversing and an approaching vehicle is detected in its path, RCTA sounds an alarm and automatically applies the brakes to stop the vehicle and minimise the risk of collision.

Safety Exit Warning (SEW)

Warns of the risk of collision with vehicles in the blind spot when an occupant opens a door to get out of the vehicle once stationary.

Driver Attention Warning (DAW)

If the DAW system senses the driver's attention level has been significantly reduced, it gives an audible warning and a graphic on the cluster.

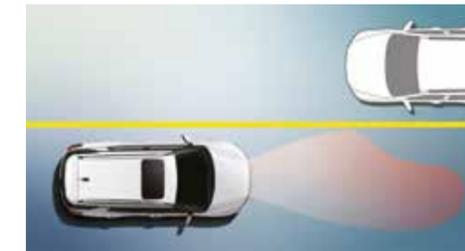

Safety Distance Warning (SDW)

SDW calculates the distance to the vehicle in front and warns the driver when a safe distance is not maintained.

Traffic Sign Recognition (TSR)

This recognises traffic signs and relays the information displayed on the sign to the driver through the cluster.

Smart High Beam (SHB)

Automatically dips the high beam when an approaching vehicle is detected, making night-driving easier and safer.
